

AGGRAND[®]

Natural Liquid Lime

Quickly and Naturally Increases Calcium Levels in the Soil

Product Description

AGGRAND Natural Liquid Lime (NLL) is an easy and effective alternative to bagged lime for use on permanent ground covers such as turf, pastures and hay fields. It features finely ground limestone in a liquid suspension that can be absorbed by leaves and roots. AGGRAND Natural Liquid Lime can be used with AGGRAND Natural Fertilizer to supply additional calcium to crops such as tomatoes, potatoes, cabbage and lettuce that need copious amounts of this vital nutrient. AGGRAND Natural Liquid Lime is the ideal product for those seeking a natural soil amendment that demonstrates superior results.

Increased Calcium Levels

Calcium is vital to plant health. It regulates opening and closing of the stomata (leaf pores), removes toxins from the tissue and contributes to the development of shoots and roots, making the plant more resistant to unwelcome invaders. Many acidic soils do not contain enough calcium to support prolific plant growth. When soil pH is below 6.0, plants may show signs of calcium deficiency such as leaf yellowing, retarded growth of roots and shoots, die-back of growing tips and premature death of older leaves. AGGRAND Natural Liquid Lime applications easily correct calcium deficiencies without the need to till in bagged lime.

- ***High-quality super-fine limestone***
- ***Specifically formulated for foliar and root applications***
- ***Use on lawns, pastures and hay fields***
- ***Combine with AGGRAND Natural Fertilizer to supply additional calcium***
- ***Easy-to-apply liquid concentrate produces no dusty mess***

Promotes Soil Health

Soil liming is vital to the health of newly planted lawns, pastures or hayfields, increasing soil microbial activity and the proliferation of earthworms and beneficial insects. Optimum soil health depends on a proper annual fertilizing plan. AGGRAND Natural Liquid Lime can help immediately produce green lawns, productive pastures and hay fields by delivering the calcium needed to promote superior plant growth.

Applications

AGGRAND Natural Liquid Lime is recommended for, but not limited to, the following applications:

- Turf
- Pastures
- Hay Fields
- Other permanent ground covers

When mixed with AGGRAND Natural Fertilizer 4-3-3, AGGRAND Natural Liquid Lime is recommended for, but not limited to, the following applications requiring extra calcium:

- Tomatoes
- Potatoes
- Cabbages
- Lettuce

Application rates vary according to plant/crop type, soil condition and weather conditions. Consult the AGGRAND Crop Guide (G2793) or www.aggrand.com for additional application information.
